

Make
iKix PLASTO
 3D PRINTS
 directly from your CAD file

Welcome to the world of boundary-less designing - With iKix Plasto 3D Prints you can now create your designs without barriers. Let your creativity flow and trust iKix to breathe form into your design and to a Plasto 3D prototype!

What are iKix Plasto 3D Prints?

Human mind thinks and conceives in 3D. And every designer wants to see the designs as exact part / prototype almost as soon as the design is ready. iKix Plasto 3D Prints help you do just that!

iKix Plasto 3D Prints offer an array of benefits. You can

- do immediate design validation and make changes - no need to wait for weeks till the mould maker responds.
- quickly check form and fit, especially in component and sub component designs
- interact better with team members, vendors and suppliers for easier communication
- use them in customer meetings and sales presentations, dealer trainings etc as a substitute for the original part.

iKix Plasto 3D Prints are economical and help you save time, cost, wastage and trouble.

What are the material and colour options in iKix Plasto 3D Prints?

You can get iKix Plasto 3D Prints in ABS, PLA and PVA. Choose from a wide variety of 30 colours and hues - more colours will be added soon.

Who can benefit from iKix Plasto 3D Prints?

- Die and Mould makers
- Space, Aeronautical Design firms
- Aircraft, Automotive companies
- Artists, Concept designers
- Medical Device makers
- Appliance Designers, Manufacturers
- Gadgets and Electronic Component makers
- Packaging designers
- Bottle and container designers
- Other Product Design Companies
- Research Institutions, Universities
- Architects, Builders, Interior Designers
- Engineering colleges, Polytechnics, Design Schools and more...

How does iKix Plasto 3D Prints facilitate your business?

- Reduce Time to market
- Make economical working models in just a few hours
- Present design ideas better to customers, colleagues, vendors, partners and dealers.
- Obtain faster design approvals
- Maintain design confidentiality by not sharing CAD files and only the parts
- Create real product like models which are functional, durable and accurate

iKix Plasto 3D Prints is the easiest way to print a part directly from a CAD file, without investing in your own 3D Printer. All you need to do is send the CAD file to us and we will deliver the 3D Part to you.
