TEAM IKIX MAKES THE 3D MODEL OF CASA GRANDE IRENE

iKix made the 3D layout model of 'Irene' for Casa Grande Pvt Ltd, the first Tudor/medieval style community in Chennai being constructed at Manapakkam.

The model comprises of 4 BHK villas, apartment building (stilt + 4) and club house (G+1) with landscape layout and landscape features as per architectural inputs. Smart control lighting system with touch pad having separate switches for all lighting options was the highlight of the model.

3D PRINTING OF BHARATH BENZ SHOWROOM

The 3D layout model of Bharath Benz showroom was made for PTK Architects comprising of the PDI building, outer display shed, covered car parking with Benz vehicles, landscape base with all landscape features and building internal lighting. The model was enclosed in a glass enclosure and transported, installed at Daimler site, Oragadam.

3D Printed Replica of Syrian Arch Destroyed by ISIS Erected in New York City

A year after the ancient city of Palmyra, Syria was destroyed by the Islamic State, a 3D printed recreation of one of its most iconic structures has begun its world tour. Originally erected in London's Trafalgar square in April, on Monday, the replica of Palmyra's Arch of Triumph was unveiled in its new location outside city hall in New York City.

Two-thirds the scale of the original, the reconstructed arch was carved from Egyptian marble blocks using a team of Italian stone-carving robots, which followed a 3D model of the arch assembled from photographs taken of the structure prior to its demise.

What our customers are saying

"It is my first interaction with 3D printing. I found iKix very customer oriented, willing to make the model as per the satisfaction of the customer"

*- Mr. Pessina, Eduardo,
General Manager, Ford*

Here's the synopsis of the brief interaction we had with Mr. Pessina.

- The challenges faced by you in your industry**
Construction of a Greenfield project for a 2.5 Miles SF IT Campus. The challenge is to trying to explain the elements of the project to people that are not in the construction field becomes easy having a model.
- What made you to use 3D printing**
It is more accurate and faster than conventional model making.
- How did you come to know about iKix**
Our contractors proposed about iKix.
- Benefits of the 3D model**
People got enthusiastic about the project itself and now everybody is engaged and more supportive.
- What has surprised you the most about working with iKix**
It is my first interaction with 3D-printing. I found iKix very customer oriented, willing to make the model as per the satisfaction of the customer.
- Did you get the model delivered on time**
Yes, very much in time.
- Would you recommend iKix to other industrial fraternity**
Certainly, I would recommend iKix to other industrial fraternity.
