

IKIX 3D PRINTS - THE WORLD OF 3D PRINTING

Dear iKix enthusiasts,

We are out again with yet another issue of inSite, hoping we are able to excite you with our latest news.

If you feel you want to include your ideas in our newsletters, we are all ears. You can correspond to business@ikix.in. In the meantime we hope you enjoy this edition of inSite.

Don't forget to drop in your valuable feedback and suggestions at info@ikix.in

Happy reading

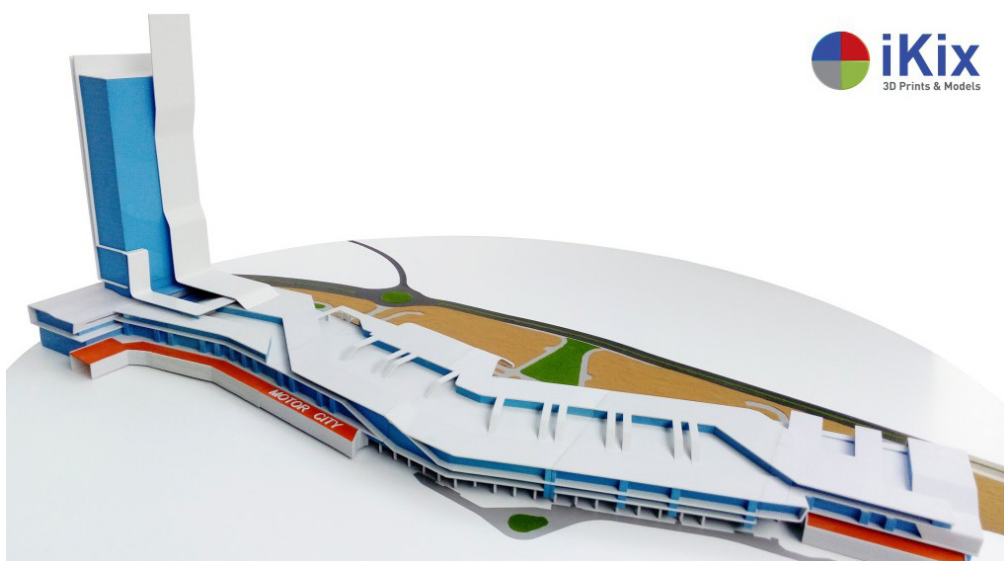

DREAM IT, BELIEVE IT, ACHIEVE IT
What the mind can conceive, it can achieve

iKix once again at it's best - makes the magnificent replica of SRM University Amaravati campus.

iKix was approached by the prestigious SRM University of Vijayawada to make a scale model of the group institution at Amaravati, the new capital city of AP, for inauguration by the honourable Chief Minister Shri Chandrababu Naidu. The actual campus is set in a sprawling 200 acre campus designed by world class architects Perkins+Will. The replica was made in 1:600 scale. The efforts of the team was well appreciated for the flawless work and delivery in 10 days time.

iKix takes on 'The Auto mall' for Atlas Al Alam Exhibitions PLC.

Attempting to outdo ourselves once again, iKix took up the challenge in 3D print with our model of the 'Auto Mall'.

The Auto Mall/ Auto Drome 3D model was supplied to Atlas Al Alam Exhibitions PLC, who are the main exhibition stand makers for Union Properties. All the intricate details of the Auto Mall - the 150 stores and the leasable area divided into two floors were showcased in the miniature model.

3D

A SNEEK PEEK INTO THE WORLD OF 3D PRINTING

Like 21st century taxidermy, 3D printing lets you freeze Fido forever.

When it was clear that 'Coppo', the 13 year old sheepdog didn't have too long left, Brian Burke, the owner of the dog day care centre that 'Coppo' went to was in a hurry to scan him. Burke immortalised him as his very first 3D Printed canine replica. Snapping 24 photos of Coppo with a single camera, Burke was able to make a perfect 3D model by stitching the photos together on a computer.
