OUR DOMESTIC PROJECT

iKix makes the 3D scale model of Casa Grand's Primera Project

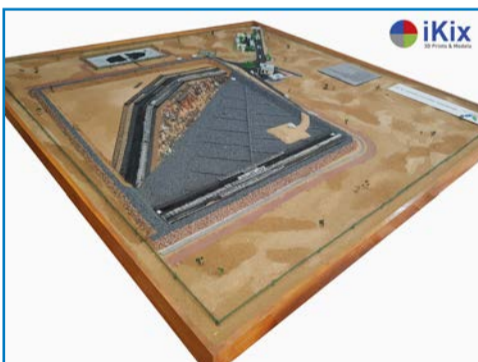

Casa Grand our customer since 2012, approached us to make the model of their upcoming Project, "Casagrand Primera" for the launch of the project.

Team iKix worked sincerely as usual to deliver the exact replica of the Architect's imagination in 10 days. Scale of the model is 200. All details like skating rink, badminton court, amphitheatre and swimming pool were incorporated.

OUR INTERNATIONAL PROJECT

One more feather to the cap, iKix makes the 3D scale replica of TATVA Environment Services LLC, OMAN

The IBRI Sanitary Landfill project model was made with usual fervor by iKixites within a span of 15 days.

The purpose of the model was to have a regular basis demonstration at the BEA'H Muscat Municipality office to all the visitors, especially schools and college students, who will be exposed to a new concept of garbage/waste disposal techniques in the Sultanate of Oman.

The customer approached us based on our previous workmanship. The end result was a happy customer who was delivered a model exactly to his requirement.

NEWS ROUNDUP

Hobs Studio 3D Prints a Giant master plan for a Giant Housing development

East London will eventually be home to over 10,800 new homes, thanks to a massive development known as Barking Riverside. The former Barking Power Station site is to become a brand new neighborhood, complete with housing for about 29,000 people as well as 65,000 square meters of commercial space.

Barking Riverside is one of Europe's largest brownfield developments and its master plan now holds the title of largest 3d printed master plan model in the UK. A very specific title, yes, but still impressive, especially considering the size of the model – 3.60 X 2.6 X 1 m. It is built in 1:750 scale and contains more than 1000 buildings, while a third of the model consists of the River Thames.

If you have any questions regarding our services, please feel free to write to us at business@ikix.in, else you could also contact us on 8939832442 / 8939832449 and we'll be more than happy to interact with you.
